

Gravity Veeam Backup

What is Gravity Veeam Backup?

Gravity Data Cloud Backup is a complete backup and recovery solution that keeps data secure, minimizes downtime and protects business operations. It's built to protect your physical, virtual and legacy systems with flexible retention & restore options—including granular restore and local failover—for rapid recovery and minimized data loss.

Key Points

1. Manage: Manage ALL Virtual, Physical, and cloud-based workloads from a single console.
2. Respond: Allow you to respond proactively to potential problems with real-time monitoring, reports and alerts
3. Restore: Restore all types of data, including entire VM's, individual files and everything in between
4. Customize: Customize your retention policy based on your compliance or other needs
5. View: View and recover application items from backups or replicas without needing to restore the VM
6. Transfer: Securely transfer data over an SSL/TLS connection using a single connection and port to simplify firewall configuration and eliminate the need for a VPN connection. It can also encrypt your backups

How it works?

With Veeam Cloud Connect, you can integrate hosted backup repositories (called cloud repositories) directly into the Veeam backup console:

- From the Veeam backup console, simply click “add service provider” and look for Gravity Data. Then enter the credentials you’ve received from us
- Your Gravity cloud repositories appear in your backup infrastructure.
- We virtualize network traffic between you and us and apply WAN acceleration.
- We securely transfer data over an SSL/TLS connection using a single port to simplify firewall configuration and eliminate the need for a VPN connection.

Gravity 365 Backup

Gravity 365 is the #1 Backup and Recovery for Microsoft Office 365 and ensured hyper-availability for users

Gravity Data Backup for Microsoft Office 365 eliminates the risk of losing access to business-critical data and ensures that you remain in complete control. With this solution, you can securely back up Office 365 Exchange Online, SharePoint Online and OneDrive for Business, as well as quickly recover individual items and efficiently perform an eDirectory of data archives so that your data is always hyper-available and your users hyper-protected.

GDS is certified Gold Cloud Solution Provider (GSP)* with Microsoft

More than 76% of Microsoft Office 365 users don't back up their data. Microsoft takes care of the infrastructure, but the data remains the customers' responsibility. This is where Gravity 365 comes to the rescue!

What does this mean for you?

With the Microsoft Office 365 shared responsibility model, Microsoft's responsibility is their global infrastructure. Many are not aware, but your Office 365 data and its protection are your responsibility. In a survey conducted by ESG, 94% of Microsoft customers believed that their Software as a Service (SaaS) solution included backup. Unfortunately, 58% of those customers have experienced data loss due to this common misconception.

- Protect your Office 365 data
Every day is unpredictable. Avoid accidental deletion, security threats and retention policy gaps.
- Quickly restore individual Office 365 items and files
Give your users the confidence they need with industry-leading recovery flexibility.
- Meet legal and compliance requirements
It's no secret how important it is to stay compliant, and with eDiscovery of Office 365 backup archives you will efficiently achieve that.

Veeam Backup for Microsoft 365 allows you to...

- Protect hybrid email and SharePoint deployments
- Migrate mailbox data between on-premises Exchange and Office 365
- Support application-aware processing of Veeam Backup for Microsoft Office 365 servers with Veeam Backup & Replication™
- Enable creation of consistent backups of Office 365 archives to streamline eDiscovery and mailbox item-level restores

Gravity 365 Backup

Why do you need an Office 365 Backup?

There are a variety of reasons why customers should use Veeam to securely backup their Office 365 data. For starters, Veeam backup enables total access and control of your data residing in Office 365, including emails. This is useful for financial requirements, productivity needs, and compliance standards.

Restore

Restore Office 365 with industry leading recovery flexibility

You trust Veeam and so do your customers. One reason is that you know you can rely on us to provide the fast and efficient granular recovery of data. Office 365 Mailbox items are no exception and can be restored with the same speed, efficiency, and granularity you have come to expect from Veeam. Your customers should never settle for anything less than the reliable, granular restoration of Office 365 email items, SharePoint sites, documents, libraries, and lists, as well as OneDrive for Business accounts, files, and folders in few simple clicks.

Leverage

Leverage powerful eDiscovery of Office 365 data archives

A main concern for customers is retrieving data for regulatory or compliance reasons. This can be inconvenient to sort through, as well as extremely costly and an overall disruption to normal business operations. Provide your customers with a trusted company solution that offers ease of use. With Veeam, they can leverage the familiar, advanced search capabilities, in addition to the flexible recovery and export options, to perform eDiscovery on Office 365 archives—just as easily as you would with a traditional on-premises data backup.

Meet compliance requirements

Compliance is always a big driver for the need to backup Office 365. With Gravity 365, you can: Store your Microsoft Office 365 data based on long-term retention policies for regulatory or compliance needs. Ensure that you recover exactly what you need—no more, no less—with granular advanced search-and-find functionality.

Gravity Cloud Connect

The Gravity Data Performance Hub Connect

The Equinix Performance Hub gives you the ability to efficiently deploy resources at the edge, closest to your end-users, enabling a whole new level of global network performance. Configured to your enterprise requirements, Performance Hub is based on a core set of vendor-agnostic components which leverage Interconnection Oriented Architecture™ to give you secure, scalable access to major network and cloud service providers in all your important markets.

Gravity Data brings down barriers to a performance hub connection by offering per rack-unit space in our private cage in the Equinix SE2 facility in Seattle, Washington. We can provide everything from just the space, power, cooling all the way to a fully managed instance of your performance hub connection!

Equinix Performance Hub provides an affordable, low-risk approach to improving network performance and reducing costs. Before committing to full-scale deployment, you can test and measure the impact of Performance Hub designs on your applications and workloads in one of our Solution Validation Centers.

How does the Gravity Performance Hub Connection benefit you?

Better Performance, Lower Cost

1. Reduce bandwidth costs by 40%
2. Significantly improve WAN performance
3. Securely connect to 2,500+ cloud providers, including: AWS, IBM, Azure, Google, Oracle Cloud
4. 65% faster web server response times
5. Run SharePoint 39% faster
6. Improve VDI launch times by 40%
7. Lower network latency for video streaming by 47%

How it works?

The Equinix Performance Hub™ solution is based on a set of core components, all of which are vendor-agnostic and can be customized and configured to meet your unique business needs.

Connectivity Solutions

- WANs connecting Performance Hub solutions to corporate data centers and branch offices
- Mobile networks and ISPs for delivering applications and web services to end users
- Direct connections to cloud services, including AWS, Oracle Cloud or Microsoft Azure
